

### ■ Features

- Universal AC input / Full range
- Built-in current sharing function(2 units)
- With power good signal output
- Built-in active PFC function
- Low leakage current<1.0mA
- Fanless design,Cooling by free air convection
- Protections: Short circuit / Overload / Over voltage / Over temperature
- 3 years warranty

### ■ Applications

- LED electronic signage
- LED display application
- LED luminous characters
- LED TV wall
- LED channel letter

### ■ Description

LHP-200 series is a 200W LED display power solution. The ultra low profile design that allows the height and weight of the sign module to be slim. It greatly simplifies the delivery and installation process. Accounting for high efficiency and energy saving, the series effectively achieves electricity reduction. It is suitable for LED signage display, moving sign, LED channel letter and LED TV wall etc.

NOTE	<p>1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.                  2. Ripple &amp; noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf &amp; 47uf parallel capacitor.                  3. Tolerance :includes set up tolerance, line regulation and load regulation.                  4. Derating may be needed under low input voltages. Please check the derating curve for more details.                  5. The ambient temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m(6500ft)                  6. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." ## ■ Installation

### 1. Operate with additional aluminum plate

In order to meet the "Derating Curve" and the "Static Characteristics", LHP-200 series must be installed onto an aluminum plate (or the cabinet of the same size) on the bottom. The size of the suggested aluminum plate is shown as below. And for optimizing thermal performance, the aluminum plate must have an even and smooth surface (or coated with thermal grease), and LHP-200 series must be firmly mounted at the center of the aluminum plate.

2. For heat dissipation, at least 5cm installation distance around the PSU should be kept, shown as below:
