End of Life (EOL) Notice

04th September 2020

To our Valued Customers:

As Laird Connectivity continue to enhance our RS1xx portfolio of Sentrius LoRa Sensors we have identified customer preference for high volume variants to also include customization and therefore unique part numbers. Due to this, the standard product BULK part numbers are being discontinued. For any customers wishing to buy standard product parts in high volume, the single packaged variants are fully available and unaffected.

As a consequence, **only the following 4 part numbers** have been made EOL with immediate effect: -

Discontinued	Description	Possible Alternative
455-0003	Sentrius RS191 Sensor, LoRa & BLE, Temp/RH, NA, 915MHz, BULK	455-0001
455-0004	Sentrius RS186 Sensor, LoRa & BLE, Temp/RH, EU, 868MHz, BULK	455-0002
455-0012	Sentrius RS191 Sensor, LoRa & BLE, Ext Port W1, NA, 915MHZ, BULK	455-00070*
455-0013	Sentrius RS186 Sensor, LoRa & BLE, Ext Port W1, EU, 868MHZ, BULK	455-00069*

* **Note**: The external temperature probe cable assembly is not included with the Sentrius sensor enclosure and each part must be ordered individually. It's a 1 to 1 ratio of region-specific sensor enclosure to sensor cable assembly.

We apologize for any inconvenience that this may cause. If you have any questions, please call your normal sales representative or one of our regional contact numbers below.

Sincerely,

Chris Boorman
Senior Product Manager
Laird Connectivity
