RE: Littelfuse 95634-01 Obsolescence Notification

Dear Valued Customer,

Littelfuse Inc., as the leading provider of total circuit protection solutions, with a global commitment to providing the highest quality products, regrets to notify you that due to an unforeseen circumstance with a key supply chain partner, part number 95634-01 is being made obsolete. This is a very mature product that has seen sharply declining volumes in recent years, and as such, one of our suppliers will no longer make the components necessary for Littelfuse to continue production.

We apologize for a lack of advance notification, but due to the nature of the interruption, this obsolescence is effective immediately. Limited quantities of this part are currently in stock and available for purchase, while supplies last. Unfortunately, Littelfuse is unable to offer alternative products as effective replacements for these parts. Please contact your local Littelfuse representative with any additional questions.

Thank you for your continued support,

A handwritten signature in black ink that reads "Zacke Naughton". The signature is written in a cursive, flowing style.
