

UbiBot[®] WS1 Pro - WIFI AND SIM VERSION is a cloud-based environmental monitoring data logger. With its built-in sensors, it detects and measures temperature, humidity and ambient light.

UbiBot[®] WS1 Pro - WIFI AND SIM VERSION has WiFi and mobile GPRS/3G/4G network 2 types of connection. A mobile GPRS/3G/4G network provides internet connection when WiFi is not available. It syncs data to the UbiBot IoT cloud platform, giving you remote access to both real-time and historical data through the UbiBot App or Web Console platform, helping you to monitor the environment from anywhere in the world and receive real-time alerts. We provide a UbiBot Global SIM card for each device for free.

With a 4.4" high-quality LCD screen, UbiBot WS1 displays current environmental conditions and shows any alerts and notifications in real time.

It has two on-board USB ports; with splitters, it can connect 2 x DS18B20 temperature probe and 1 x RS485 probe at a time, and can be connected simultaneously with the external power source.
