Description

The PE2CP1053 operates from 1000 MHz to 3000 MHz and can handle 450 watts of power with 16 dB isolation. The package is 1.35 inch by .5 inch and can be attached to a heat sink by screws. The gold plated leads are soldered to the PCB. This 90 degree hybrid has a VSWR of 1.35:1 and an insertion loss of 0.3 dB.

The PE2CP1053 is part of Pasternack's family of 90 degree hybrid couplers in drop-in packages. These couplers feature small drop-in packages that can handle power up to 1000 watts. They are available in both narrow and broad bandwidths. These quadrature hybrids are excellent for any situation to either equally split an input signal into two paths with a 90 degree phase shift between them or to combine two signals while maintaining high isolation between them.
