

8 Series

Toggle Switches

■ Introduction

The 8 Series Toggles is Copal Electronics' high-reliability miniature switch product offering. This product line meets and exceeds all basic international switch standards.

With 8 toggle options, PC and solder lug terminals, power and logic level current ratings, 1-4 pole and many circuit offerings these switches can be used in many industries and various applications within these industries.

Four of the 8 Series lines are washable. Specifically designed for PC applications with automated solder and cleaning methods.

The 8 Series is available with UL Recognition and CSA Certification upon request from the customer.

■ Applications

- Communication equipment
- Computer peripheral equipment
- Measuring instruments
- Medical equipment
- Automotive diagnosis

The switches can be used in a wide range of fields from industrial to consumer equipment.

■ Features of 8 Series Toggles

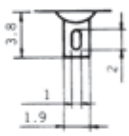

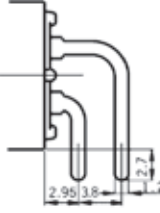

- 1. Terminal style :**
Solder, Straight, Right angle and vertical mount PC terminals.
 - 2. Contacts :**
Silver or gold.
 - 3. Epoxy resin case :**
UL94V-0 self-extinguishing epoxy.
 - 4. Actuator styles :**
Over 30 actuator variations.
 - 5. Insulation between terminal and ground :**
4 mm minimum.
 - 6. Prevention of flux entry**
The epoxy resin seal on bottom of the switch helps prevent the entry of solder and flux.
 - 7. Insulation barrier :**
Insulation barrier design between poles helps prevent short-circuiting between poles ensuring high reliability.
 - 8. UL Recognized product** **File No.E43275**
 - 9. CSA Certified product** **File No.LR38341**
 - 10. For the UL Recognized and CSA Certified products please see page 409.**

(*1) : Switches with gold-plated contacts ("C") are made-to order products.
MOQ is 25 pcs.

Note : Some combinations may not be available. Please check the "Table of Part Numbers" for each series.

8 Series Toggles Common Specifications

Contact specs.		Silver	Gold
Rating	Max.	AC125V 6A AC250V 3A DC30V 4A	AC125V 6A AC250V 3A DC20V 25mA
Initial contact resistance		10mΩ Max. (DC2~4V 1A)	20mΩ Max. (AC200μV 1.5mA)
Initial dielectric strength		AC1500V 1 minute	
Initial insulation resistance		1000MΩ Min. (DC500V)	
Electrical life	Alternate type	50,000 cycles	
	Momentary type	25,000 cycles	
Operating temperature range		-30~+85°C	
Storage temperature range		-40~+85°C	

(ON) : Momentary.

8G

Washable

RoHS Compliant

Washable Toggle Switch

Features

The 8G Washable Toggle Switch is designed for PC boards and are easily mountable on the board. A PC support terminal is provided for stable mounting. The process-sealed structure allows cleaning after soldering.

Precaution (8G, 8GA)

1. Soldering Specifications

(1) Manual soldering

Device : Solder iron

- ① 350°C Max. 3 sec. Max.
- ② 310°C Max. 7 sec. Max.

(2) Auto soldering

Device : Jet wave or dip type

- ① 270°C Max. 5 sec. Max.
- ② 250°C Max. 7 sec. Max.

Pre-heating should be done at temperatures below 100°C and within 30 seconds.

2. Flux Cleaning

- (1) Solvent : Fluorine or Alcohol type.
- (2) Cleaning after soldering should be done after the terminal temperature falls to 90°C or below, or after leaving the switch for five minutes or longer at room temperature.
- (3) Do not use the ultrasonic cleaning.

3. Mounting

- Do not bend the terminals before mounting the switch on the PC board.
- After mounting the switch, do not place the device in such a way that the device weight will be applied on to the actuator of the switch.

4. Mounting Accessories

Mount the accessories after soldering and flux cleaning.

■Precautions (8A • 8B • 8C • 8D • 8E • 8F • 8J • 8SS)

1. Soldering Specifications

(1)Manual soldering

Device : Solder iron

①420°C Max. 3 sec. Max.

(2)Auto soldering

②275°C Max. 6 sec. Max.

The above-stated soldering conditions shall apply only to switches with straight terminals. Auto soldering is not possible with right-angle terminals. Switches with right-angle terminals should be soldered manually according to the conditions specified in (1) above.

(3)When soldering two or more terminals to the common land, use the solder resist to isolate the terminals.

2.Flux Cleaning

(1)Solvent : Fluorine or Alcohol type.

(2)8A/B/C/D/E/F/J series are not washable. To wash the PC board, clean the soldering surface of the PC board with a brush so that the switch is not exposed to the cleaning solution.

(3)Cleaning after soldering should be done after the terminal temperature falls to 90°C or below, or after leaving the switch for five minutes or longer at room temperature.

3. Mounting

●Do not bend the terminals before mounting the switch on the PC board.

●After mounting the switch, do not place the device in such a way that the device weight will be applied on to the actuator of the switch.

●For switches with straight terminals, solder the switch on the PC board after fixing the switch on the panel with a nut.
