AK1221

3500MHz High Lineartity Mixer

1. Overview

The AK1221 is high linearity mixer. RF and Lo frequency range coverage is from 700 to 3500MHz and IF coverage is from 20 to 1000MHz. The RF input provides single-ended 50Ω interface. Lo ports are 50Ω matched and complementary input should be decoupled to the ground. IF output ports are differential open drain outputs. The linearity and power consumption performances can be optimized by the resistance connected to the BIAS Pin.

2. Features

- ☐ Operating Frequency: 700MHz to 3500MHz
- ☐ Linearity vs. Power selectable architecture
  Power Consumption: 45mA, IIP3: +25dBm, Gain: -0.5dB, NF: 14dB
- ☐ Lo input level: 0dBm ±5dB
- ☐ Operating Supply Voltage: 4.75 to 5.25 V
- ☐ Package: 16pin UQFN (0.5mm pitch, 3mm × 3mm × 0.60mm)
- ☐ Operating Temperature Range: -40 to 85°C

3. Applications

- ☐ Cellular BTS / Repeater
- ☐ Two-way Radios (PMR/LMR)

7. Pin Functional Description

Table 1 Pin Function

No.	Name	I/O	Pin Functions	Remarks
1	RFIN	AI	RF Input	Connecting an inductor between this pin and ground.
2	VSS	G	Ground pin	
3	VSS	G	Ground pin	
4	LOINN	AI	Lo Input Negative	
5	LOINP	AI	Lo Input Positive	
6	VDD	P	Power Supply	
7	VDD	P	Power Supply	
8	VDD	P	Power Supply	
9	VDD	P	Power Supply	
10	BIAS	AIO	Resistance pin for current adjustment	Connecting a resistor between this pin and ground.
11	IFOUTN	AO	IF Output Negative	This pin is open drain output. It needs power feeding via an inductor.
12	IFOUTP	AO	IF Output Positive	This pin is open drain output. It needs power feeding via an inductor.
13	VSS	G	Ground pin	
14	VSS	G	Ground pin	
15	VSS	G	Ground pin	
16	VSS	G	Ground pin	

Note) The exposed pad at the center of the backside should be connected to ground.

AI : Analog input pin	AO : Analog output pin	AIO : Analog I/O pin
P : Power supply pin	G : Ground pin	

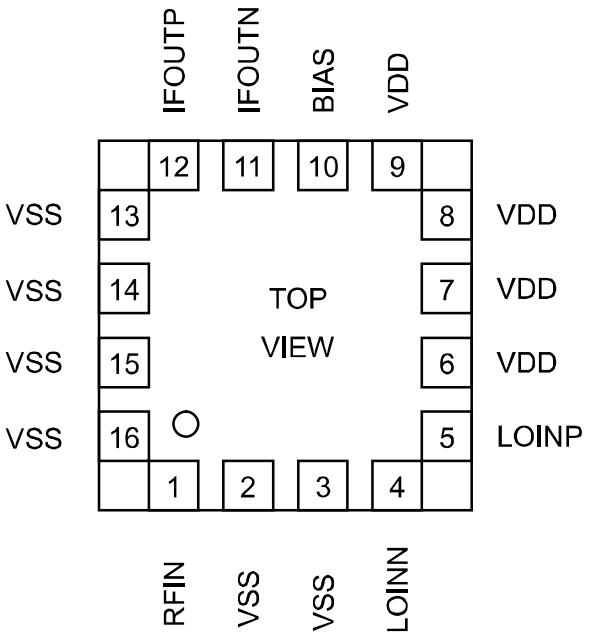

Figure 3. Package Pin Layout

8. Absolute Maximum Ratings

Table 2 Absolute Maximum Ratings

Parameter	Symbol	Min.	Max.	Unit	Remarks
Supply Voltage	VDD	-0.3	5.5	V	
RF Input Power	RFPOW		12	dBm	
LO Input Power	LOPOW		12	dBm	
Storage Temperature	Tstg	-55	125	°C	

Exceeding these maximum ratings may result in damage to the AK1221. Normal operation is not guaranteed at these extremes.

9. Recommended Operating Range

Table 3 Recommended Operating Range

Parameter	Symbol	Min.	Typ.	Max.	Unit	Remarks
Operating Temperature	Ta	-40		85	°C	
Supply Voltage	VDD	4.75	5	5.25	V	

The specifications are applicable within the recommended operating range (supply voltage/operating temperature).

10. Electrical Characteristics

1. Analog Circuit Characteristics

Unless otherwise noted IF output=150MHz, Lo Input Level=-5dBm to +5dBm, Output Load Resistor (RLoad)=680Ω, VDD=4.75 to 5.25V, Ta=-40°C to 85°C

Parameter		Min.	Typ.	Max.	Unit	Remarks
RF Input Frequency		700		3500	MHz	
Lo Input Frequency		700		3500	MHz	
IF output Frequency		20		1000	MHz	
Lo Input Power		-5	0	+5	dBm	
Current Adjustment Resistor(BIAS)		22		56	kΩ	
IDD	BIAS=22kΩ		64	87	mA	The total current of VDD pin, IFOUTP pin and IFOUTN pin.
	BIAS=33kΩ		45	64	mA	
	BIAS=56kΩ		30	44	mA	
RFIN=2500MHz, Current Adjustment Resistor =33kΩ						
Conversion Gain		-2.5	-0.5	1.5	dB	
SSB Noise Figure			14	16.5	dB	Design guarantee value
IP1dB		7	10		dBm	
IIP3		21	25		dBm	Design guarantee value

11. Typical Performance

Unless otherwise noted, RF input =2500MHz, Lo input =2350MHz, IF output =150MHz,
Output Load Resistor (RLoad)=680Ω

14. Application Information

•Impedance matching network with LC

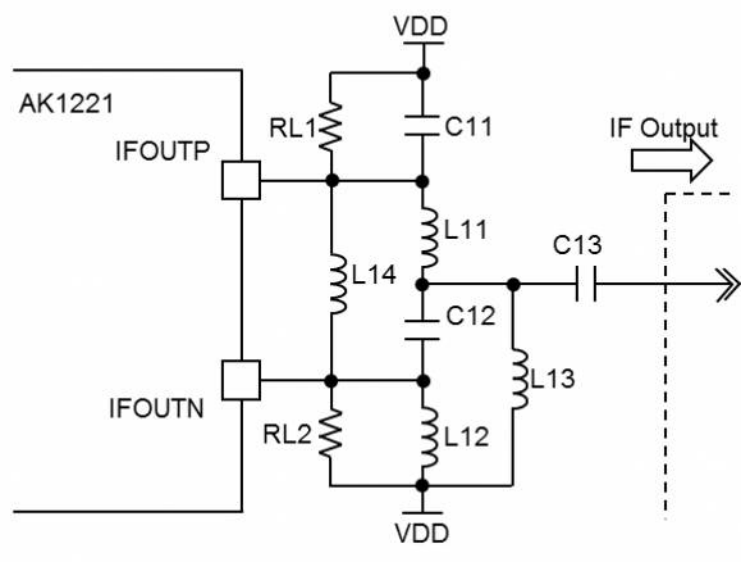

Figure 12. Impedance matching network with LC

Impedance matching network with LC is shown in Figure 12. AK1221 has open drain outputs, so RL1 + RL2 is output load resistance. C11 and L11 compose lowpass filter. C12 and L12 are for highpass filter. C13 is DC blocking capacitor and L13 is RF choke. IFOUTP and IFOUTN pins need power feeding via L11, L12 and L13.

The differential voltage from IFOUTP/N can be converted to a single-ended by L11, L12, C11 and C12 properly. The differential impedance (RL1 + RL2) is converted to single-ended output terminating impedance Ro.

L11, C11, L12 and C12 are calculated as below. f_{out} is IF output frequency.

$$C_{11} = C_{12} = \frac{1}{2\pi * f_{OUT} * \sqrt{(R_{L1} + R_{L2}) * R_O}}$$

$$L_{11} = L_{12} = \frac{\sqrt{(R_{L1} + R_{L2}) * R_O}}{2\pi * f_{OUT}}$$

For example, in the case of IF Output = 50MHz, Output Load Resistor (Rload) = 660Ω in 50Ω interface, L11, C11, L12 and C12 are calculated as below.

$$C_{11} = C_{12} = \frac{1}{2\pi * (150 * 10\text{^}6) * \sqrt{660 * 50}} = 5.84\text{pF}$$

$$L_{11} = L_{12} = \frac{\sqrt{660 * 50}}{2\pi * (150 * 10\text{^}6)} = 193\text{nH}$$

L13 and C13 should be large enough not to affect the impedance at IF output frequency. In some cases the impedance matching can be optimized by L13 and C13.

For example, in the case of IF Output = 150MHz, Output Load Resistor (Rload) = 660Ω in 50Ω interface, it is recommended to choose 2200nH and 1000pF as L13 and C13. If any correction is needed, it can be adjusted by reducing the value of L13 and C13.

In some cases L14 can be selected to resonate with IF output capacitance. The typical differential output impedances for several frequencies are below. In the case of IF Output = 150MHz, it is recommended to choose 1000nH as L14.

	Differential Output Impedance		Matching Element
IF Output Frequency [MHz]	R[ohm]	jX[ohm]	L14 [nH]
20	2300	-J4083	OPEN
50	711	-J2448	OPEN
70	419	-J1873	OPEN
100	244	-J1420	2200
150	109	-J932	1000
180	77	-J788	750
200	62	-J706	560
250	38	-J566	360
300	28	-J470	240
400	16	-J346	150
500	15	-J270	82
600	13	-J223	62
700	10	-J188	43
800	9	-J159	33
900	7	-J138	24

These calculated values are approximation. In some cases, some correction is needed due to the effect of parasitic capacitance of external parts or/and PCBs. The impedance matching network components should be decided through enough evaluation on AK1221.

Typical Performance using impedance matching network with LC is below. RF Input = 2500MHz, IF Output = 150MHz, LO Input = 2350MHz, Output Load Resistor (Rload) = 660Ω, Vdd = 5V, Ta = 25°C, LO Input Level = 0dBm, current adjustment resistor =33kΩ.

Ref.	Value	Size	Part Number
RL1, RL2	330Ω	1005	KOA RK73B1ETTP331
L11, L12	200nH	1608	Murata LQW18ANR20G00
C11, C12	6pF	1005	Murata GJM1552C1H6R0DB01
L13	2200nH	2012	Murata LQW21HN2R2J00
C13	1000pF	1005	Murata GRM1552C1H102JA01
L14	1000nH	2012	Murata LQW21HN1R0J00

Parameter	Min.	Typ.	Max.	Unit
Conversion Gain		-1.1		dB
SSB Noise Figure (NF)		13.8		dB
IP1dB		11.6		dBm
IIP3		24.8		dBm

The phase and amplitude balance is achieved at IF Output frequency by using impedance matching network with LC. The port-to-port leakage is improved with the phase and amplitude balance is achieved at RF, LO, and IF frequency with wide band balun.

Note 1. 1 pin marking is only a reference for the 1 pin location on the top of package.

16. Marking

(a) Style : UQFN

(b) Number of pins : 16

(c) 1 pin marking: : ○

(d) Product number : 1221

(e) Date code : YWWL (4 digits)

Y : Lower 1 digit of calendar year (Year 2012 → 2, 2013 → 3 ...)

WW : Week

L : Lot identification, given to each product lot which is made in a week
→ LOT ID is given in alphabetical order (A, B, C…).

IMPORTANT NOTICE

0. Asahi Kasei Microdevices Corporation ("AKM") reserves the right to make changes to the information contained in this document without notice. When you consider any use or application of AKM product stipulated in this document ("Product"), please make inquiries the sales office of AKM or authorized distributors as to current status of the Products.
1. All information included in this document are provided only to illustrate the operation and application examples of AKM Products. AKM neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of AKM or any third party with respect to the information in this document. You are fully responsible for use of such information contained in this document in your product design or applications. AKM ASSUMES NO LIABILITY FOR ANY LOSSES INCURRED BY YOU OR THIRD PARTIES ARISING FROM THE USE OF SUCH INFORMATION IN YOUR PRODUCT DESIGN OR APPLICATIONS.
2. The Product is neither intended nor warranted for use in equipment or systems that require extraordinarily high levels of quality and/or reliability and/or a malfunction or failure of which may cause loss of human life, bodily injury, serious property damage or serious public impact, including but not limited to, equipment used in nuclear facilities, equipment used in the aerospace industry, medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, devices related to electric power, and equipment used in finance-related fields. Do not use Product for the above use unless specifically agreed by AKM in writing.
3. Though AKM works continually to improve the Product's quality and reliability, you are responsible for complying with safety standards and for providing adequate designs and safeguards for your hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of the Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption.
4. Do not use or otherwise make available the Product or related technology or any information contained in this document for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). When exporting the Products or related technology or any information contained in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. The Products and related technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
5. Please contact AKM sales representative for details as to environmental matters such as the RoHS compatibility of the Product. Please use the Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. AKM assumes no liability for damages or losses occurring as a result of noncompliance with applicable laws and regulations.
6. Resale of the Product with provisions different from the statement and/or technical features set forth in this document shall immediately void any warranty granted by AKM for the Product and shall not create or extend in any manner whatsoever, any liability of AKM.
7. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of AKM.
