

Leuven, July 1, 2021

Dear customer,

Option has put the following product in end-of-life mode:

- **CG0199-12102** (CloudGate LTE US Rev3)

This product will be replaced by this part number:

- **CG0124-12135** (CloudGate LTE WW Rev4)

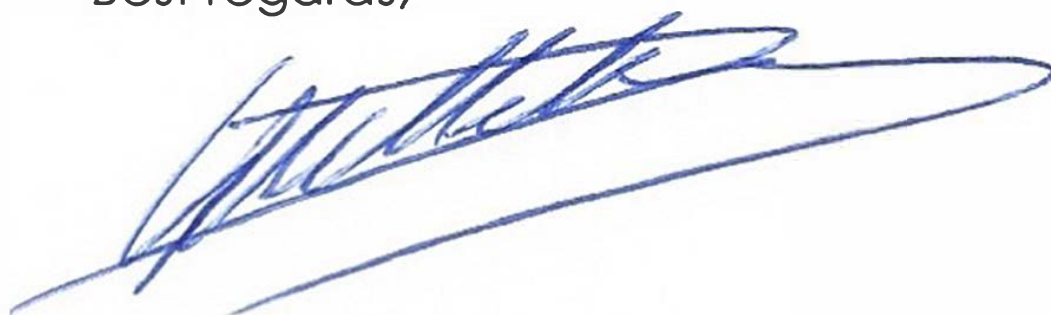

This product is fully hardware and software compatible with the Rev2 version and has the following improvements:

- A new WW modem with 20 LTE bands, 7 3G bands, 4 2G bands.
- 2 RJ45 Ethernet interface ports instead of 1 RJ45 port
- MicroSD card holder, accessible behind the back cover plate
- Micro SIM card holder instead of Mini SIM card holder
- The possibility to mount an optional battery backup card (ex-factory)

The CloudGate LTE US Rev3 will be available as long as local stock lasts. No new production is planned of this variant.

Best regards,

Patrick Willekens
Head of Sales
