

ENGINEERED FOR LIFE

ITT Cannon LLC
56 Technology Drive
Irvine, CA 92618 USA

July 13, 2018

DIGI-KEY CORP.

Subject: Product Change Notification

Dear Valued Customer and Partner:

This is a formal notification that ITT Cannon LLC ("ITT") is relocating the manufacturing operations of some part numbers ("Impacted Parts") from our facility located at 56 Technology Drive, Irvine, California ("Irvine Facility") to our existing production facility in Nogales, Mexico ("Nogales Facility").

This change in manufacturing location impacts a limited number of part numbers manufactured in the last several years at the Irvine Facility and is expected to further optimize the manufacturing and assembly process of the Impacted Parts. The Nogales Facility has been the primary manufacturing facility for similar products within the same product lines for the past several years and operates under the same quality system and operational processes as the Irvine Facility. As a result, this change in manufacturing location will not affect the form, fit or function of the Impacted Parts.

To ensure a smooth transition, this process is being led by Art Dunn, VP of Operations and managed by ITT's Standard Transition Plan ("STP"). The STP is a comprehensive process that identifies activities, resources, assets, and timelines to assess readiness to move a product. Furthermore, ITT will perform First Article Inspections on all products prior to shipping from the Nogales Facility.

ITT intends to transition any open orders you may have for the Impacted Parts by July 13, 2018. Going forward from this date, ITT will manufacture and ship any future orders for the Impacted Parts from our Nogales Facility.

On the next page, you will find a list of open orders as of the date of this letter for your reference.

For your records, our Nogales Facility is located at:

Avenida Libre Comercio S/N
Col. Parque Industrial Nuevo Nogales
Nogales, Sonora, México C.P. 84093

If you have any questions, please contact your ITT Sales Representative.

Sincerely,

The ITT Cannon Team
