Product Change of Manufacturing Location Announcement (Quarter Brick DC-DC BMP series)

Dear End-Customer or Sales Channel Partner,

We are writing to you because our records show that you have bought products from us within the last 3 years which we manufactured in our Contract Manufacturing (BCM) plant in Malaysia.

Bel Power Solutions has decided to move this production to our own internal manufacturing plant in WingMing, China. Most active products manufactured in Malaysia will be transferred. This transfer will occur in the next 6 months – timing varies by family series and individual product part number.

See second page for products which are being transferred, some rationalisation of products has already occurred and those items not on the list may currently be on LTB.

We are planning and executing this transfer very carefully to minimise disruption to product quality and production lead-times.

In the meantime, if you have any questions or special requirements about our product transfer (qualification or approval process especially), please do not hesitate to contact your Bel Power Solutions sales representative or customer service representative.

Product lines effected:-

QM and QME series (Quarter Brick DC-DC BMP series)

We would also like to take this opportunity to thank you for your business in the past and to assure you that everything we do is aimed at becoming your power supply partner of choice in the future.

Yours faithfully

Dara Crowe
Product Manager
Bel Power Solutions

Quarter Brick BMP Products transferring to BEL Fuse - WingMing facility

QM and QME Series products transferring to internal Bel Factory in WingMing

Part Number	Expected transfer complete date	Samples available if required (date)
