

# PRODUCT CHANGE NOTIFICATION

Product Category COPPER CONNECTORS 20210728-3

Product Group ENTERPRISE CONNECTIVITY

ISSUE DATE: 28-Jul-21

IMPACTED REGIONS:  NA  EMEA  LATAM  AP

REASON FOR CHANGE:  DISCONTINUATION  
 OTHER

## DESCRIPTION OF CHANGE: (Required)

NetKey punchdown-style jack modules are undergoing a modification to the manufacturing process. External form and fit will be unchanged and visual appearance will be virtually identical. Since this is a running update, there is no change to the part number or product specifications at this time. This Product Change Notification is intended to be informative; no further action need be taken.

Affected products include NetKey punchdown-style jack modules in Category 6A (NK6X88M\*\*), Category 6 (NK688M\*\*), and Category 5e (NKP5E88M\*\*).

Details of changes are described below:

- The material for the front housing is being changed from an ABS to a polycarbonate resin to provide a maximum operating temperature of 75°C for the jack modules. Panduit has worked extensively to match as closely as possible the appearance of the existing material however very minor differences in color shade or surface gloss may be noticeable on some jack colors under certain lighting conditions.
- Minor internal changes have been made and will result in a slight cosmetic difference at the port opening of the jack modules (see images below).

The change will roll out to NetKey jack module product lines and global warehouses over time, beginning on the availability date below and continuing throughout 2021.
