The following Phoenix Contact products have been modified. Existing specifications will be met or exceeded. Please review and acknowledge this document and inform your personnel as needed.

Description for Product Change Notification

CBMC IO-Link model functionality has been enhanced with the addition of a reset-capable alarm feature that does not affect the channel status. This newly added function is disabled by default and has to be enabled via non-cyclic process data. The IODD configuration files for the referenced products have been revised to accommodate this new feature.

Production batch revision numbers have been incremented from P/B 04 to P/B 05.

REF: CCL210023-00
