PANDUIT

6.5" x 6.5" CABINET TOP CABLE PROTECTION BEZEL & COOL BOOT AIR SEALING FITTING

Part Numbers: CTNBZL6X6 and CTGN6X6

INSTALLATION INSTRUCTIONS **RW297**

Steps Required for Installation of the 6.5" X 6.5" Cabinet Top Cable Protection Bezel

Tin snips or wire cutters

Step 1: Using tin snips or wire cutters, cut the (8) tabs and remove cut-out from top of cabinet.

Step 2: File down any burrs left behind from cutting tabs of cut-out.

Hand File

Step 3: Insert bezel into top of cabinet by snapping into place over each latch. Visually inspect to ensure all latch tabs have engaged below the opening.

Step 4: Apply moderate forces in the upward direction to ensure the part is secured into the cabinet top cap. Repeat steps 1 thru 4 as needed.

## Additional Steps Required for Installation of the 6.5" X 6.5" Cool Boot Air Sealing Fitting
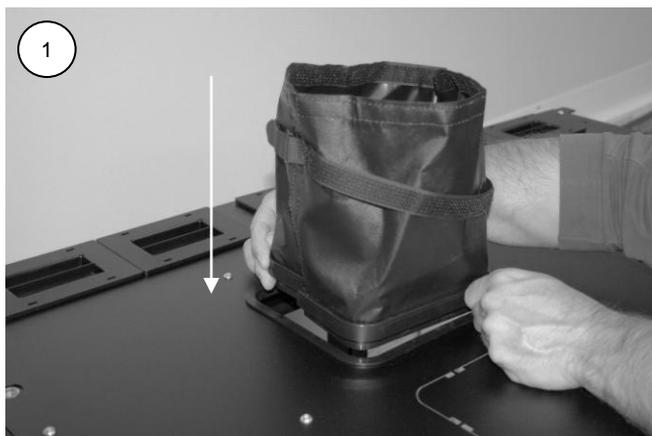

Step 1: Install Cool Boot by pressing down on top of the outer edges of the fitting assembly.

Step 2: With the fabric of the cool boot opened up, route the cable bundle through the opening.

Step 3: Seal the hook and loop strip along the top edge of the fabric sleeve

Step 4: Pull the cinch tie tight around the cable bundle as shown. Wrap the cinch tie around the cable bundle and attach it to itself. If applicable, trim off excess cinch tie material.
