Dear customer,

From time to time we find it necessary to change, modify, or replace our product offering. These changes are usually the result of advancements in technology that offer improvements in performance or manufacturability. The unavailability of component parts, generally of an earlier technology or an older design, can also cause the obsolescence of outdated products.

The standard models listed below, being based out of an older generation of components, will be entering its end of life phase because of part obsolescence that our suppliers have stopped producing.
