

WILDLIFE LINE GUARD (WLG-60)

UP TO 69 kV

KEY FEATURES

- Designed to deter climbing and perching wildlife without risk to the animal or network
- Suitable for substation and overhead line applications
- Excellent UV and mechanical resistance performance
- Hot-stickable and easy to install
- Comes in 2 pre-assembled sections
- Suitable for conductors up to 795 kcmil

TE Connectivity's (TE) Wildlife Line Guard provides protection against wildlife interference in substations and on overhead lines. The line guard's spindle design deters wildlife from running down the overhead conductors and entering into the substation.

The WLG-60(B1) comes fully assembled in two 30-inch (76.2 cm) sections that can be quickly and easily installed without interruption to the network. Thanks to the robust and reliable clamping device, the product remains anchored in a fixed position without sliding along horizontal lines and without any component rotating directly on the conductor.

For decades, TE has specialized in Wildlife and Asset Protection products to prevent network outages and minimize harm to birds and animals.

Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.

Wildlife Line Guard (WLG)

TE's Wildlife and Asset Protection products and systems of tubes, tapes, sheets, pre-formed covers and barriers provide a proven, cost-effective and easy-to-install solution to bird, animal and weather related outages.

PRODUCT SELECTION

Product Description	Conductor Usage Range (gauge/ kcmil)	Voltage Application	Standard Pack
WLG-60(B1)	#6-795	up to 69 kV	1
