LF PCN# A0081 Notification of Obsolescence of FK3 and TOE Copper Blade Fuses

May 7, 2015

Dear Valued Customer,

Littelfuse Inc. would like to notify you of the obsolescence of the FK3 32V and TOE 58V Copper Blade fuses. A critical component to produce these products has been made obsolete at our supplier. These products are designed with an aging technology and Littelfuse will not invest in the development/testing of new components for this aging product. We offer as a replacement the Maxi fuse series with the silver plated zinc alloy blade.

Littelfuse will continue to produce while we have stock of the raw materials. Unfortunately, we are out of stock on the components needed to produce the 70A product, so the 70A materials will be made obsolete immediately.

OB Material	OB Material Description	Replacement Material	Replacement Material Description
142.6885.5202	Fuse - TOE 58V / 1000A DC, 20A 1000 pc	0999020.ZXN	Fuse - Maxi 58V 20A 1200 pc
