HERMAPHRODITIC PUSH-PULL CONNECTORS

H SERIES

LEMO

Precision modular connectors to suit your application

Since its creation in Switzerland in 1946 the LEMO Group has been recognized as a global leader of circular Push-Pull connectors and connector solutions. Today LEMO and its affiliated companies, REDEL and COELVER, are active in more than 80 countries with the help of over 40 subsidiaries and distributors.

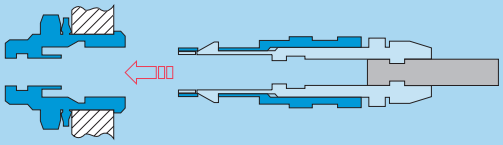
Over 75000 connectors

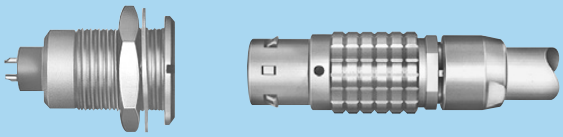
The modular design of the LEMO range provides over 75000 connectors from miniature ø 3 mm to ø 50 mm, capable of handling cable diameters up to 30 mm and for up to 114 contacts.

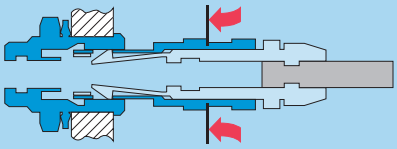
This vast portfolio enables you to select the ideal connector configuration to suit almost any specific requirement in most markets, including medical devices, test and measurement instruments, machinery, audio video broadcast, telecommunications and military.

LEMO's Push-Pull Self-Latching Connection System (not shown in this catalogue)

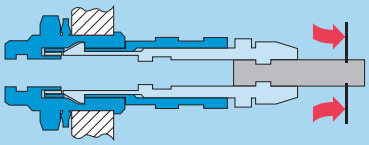
This self-latching system is renowned worldwide for its easy and quick mating and unmating features. It provides absolute security against vibration, shock or pull on the cable, and facilitates operation in a very limited space.



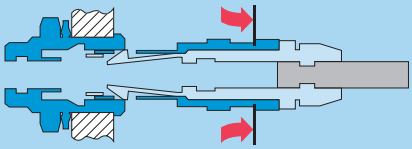




The LEMO self-latching system allows the connector to be mated by simply pushing the plug axially into the socket.



Once firmly latched, connection cannot be broken by pulling on the cable or any other component part other than the outer release sleeve.



When required, the connector is disengaged by a single axial pull on the outer release sleeve. This first disengages the latches and then withdraws the plug from the socket.

UL Recognition

LEMO connectors are recognized by the Underwriters Laboratories (UL). The approval of the complete system (LEMO connector, cable and your equipment) will be easier because LEMO connectors are recognized.

CE marking

CE marking means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives. CE marking applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

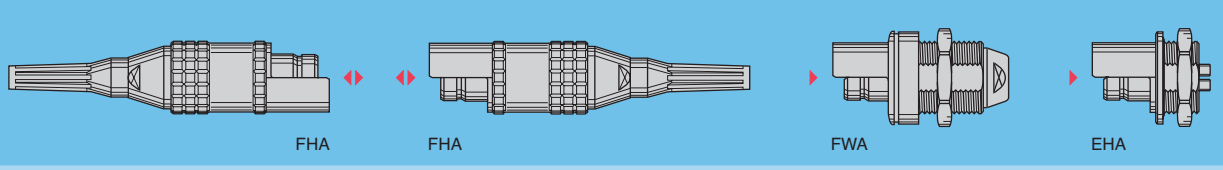
RoHS

LEMO connector specifications conforms the requirements of the RoHS directive (2011/65/EU) of the European Parliament and the latest amendments. This directive specifies the restrictions of the use of hazardous substances in electrical and electronic equipment marketed in Europe.

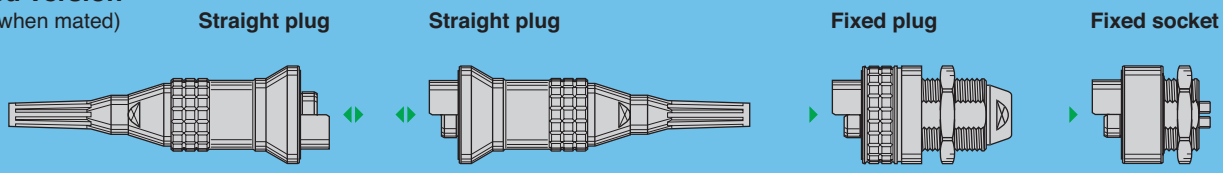
SH-MH Series

The LEMO Hermaphroditic series provide a rugged high performance patented push-pull hermaphroditic interconnection system. These «genderless» connectors combine LEMO's well proven push-pull latching technology and the use of our standard high quality optical and electrical contacts.
The main features of these series are as follow:
– security of a new patented push-pull hermaphroditic self-latching system
– 2 shell sizes, SH and MH series
– compact unsealed version for general purpose applications
– rugged waterproof (IP 68) version for all outdoor applications
– a choice of multifibre or electrical contacts configurations
– lightweight design with shell in anthracite nickel-plated aluminium alloy
– low loss ceramic PC technology in multimode and singlemode
– gold plated electrical contacts.
Each series consists of plug and socket which will accept cable diameter ranging from 3.6 mm to 10 mm. Initial program is giving solutions with 2, 4 or 6 fibre optic channel and 6 or 12 electrical contacts.

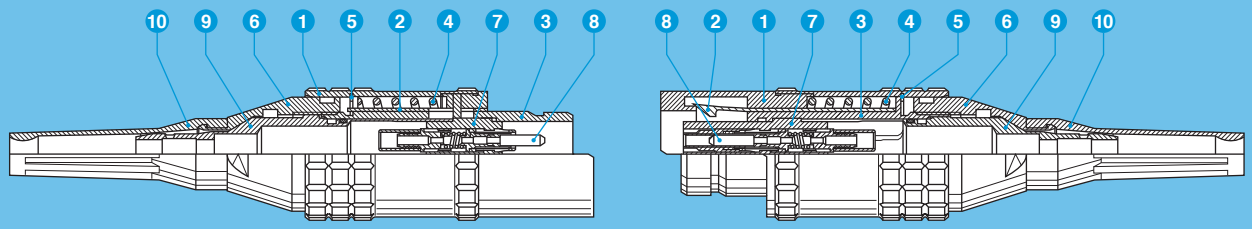
Standard version
(IP 50 when mated)



Sealed version
(IP 68 when mated)



Part Section Showing Internal Components



1 shell
2 latch sleeve
3 inner shell
4 spring
5 circlip
6 collet nut
7 insulator
8 optical contact
9 cable adapter
10 bend relief

Technical Characteristics

Mechanical and Environmental

Characteristics			Value	Standard
Mating durability			2000 cycles	IEC 60512-5 test 9a
Temperature range			-55°C to +125°C[1)]	
Vibration resistance			10-2000 Hz, 15 g	IEC 60512-4 test 6d
Shock resistance			100 g, 6 ms	IEC 60512-4 test 6c
Protection index FHE/FHE			IP 68	IEC 60529
Water immersion FHE/FHE			up to 2 meters depth	
Protection index FHA/FHA			IP 50	IEC 60529
Average latching retention	SH series	plug/plug	600 N	IEC 60512-8 test 15f
		plug/socket	300 N	IEC 60512-8 test 15f
	MH series	plug/plug	800 N	IEC 60512-8 test 15f
		plug/socket	400 N	IEC 60512-8 test 15f

Electrical

Characteristics	Value	Standard
Insulation resistance	> 10^{12} Ω	IEC 60512-2 test 3a
Contact resistance	< 3.6 mΩ	IEC 60512-2 test 11f
Shell resistance	< 10 mΩ	IEC 60512-2 test 2f

Notes: [1)] with f.o. contacts temperature range -40°C/+80°C

Optical

Characteristics	Value	Standard	Method
Average insertion loss fibre 9/125 µm	0.18 dB	IEC 61300-03-34	Method 2
Average insertion loss fibre 50/125 µm	0.25 dB	IEC 61300-03-34	Method 2
Return loss fibre 9/125 µm (UPC)	≥45 dB	IEC 61300-03-06	Coupler Method
Return loss fibre 9/125 µm (Hand polish)	>25 dB	IEC 61300-03-06	Coupler Method

Materials and Treatments

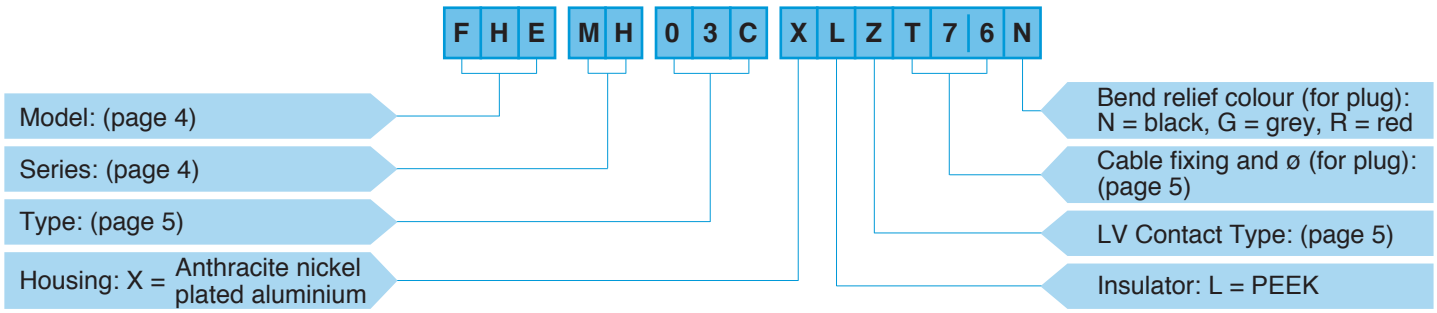
Component	Material (Standard)	Surface treat (µm) nickel Cu	Ni	Au
Outer shell, collet nut[1)]	Alum. (AA 6262A or AA 6023)	–	5	–
Latch sleeve	Special brass	0.5	3	–
Other metallic parts	Alum. (AA 6262A or AA 6023)	–	5	–
Spring	Stainless steel	without treatment		
Insulator	PEEK	without treatment		
Electrical contacts	Brass (male)/Bronze (female)	0.5	3	1
O-ring and gaskets	Silicone MQ / MVQ	without treatment		

Notes: [1)] anthracite colour

Part Number Example

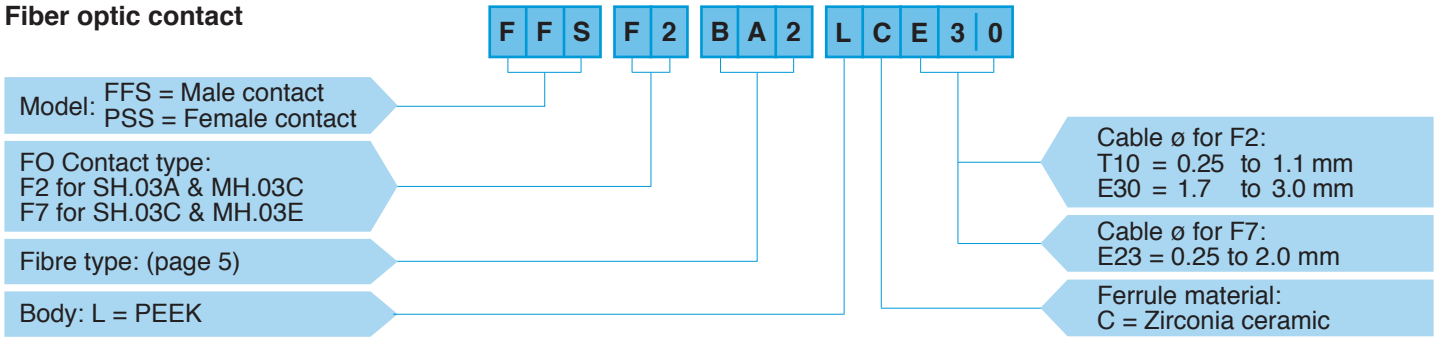
A different part number structure is applicable for each of the following product types:
– Plugs and fixed sockets; fibre optic contacts.
Note: The fibre optic contacts must be ordered separately. An equal number of contacts must be ordered (eg. for MH.03C; 2 x FFS.F2 and 2 x PSS.F2).

Straight plug with bend relief



FHE.MH.03C.XLZT76N = Straight plug (IP 68 when mated), MH series, multifibre to accept 4 F2 type fibre optic contacts, anthracite nickel plated aluminium shell, PEEK insulator, with cable fixing type T for 7.5 to 6.6 mm cable and black bend relief.

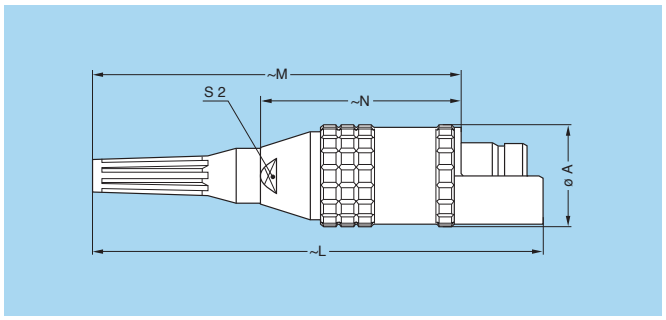
Fiber optic contact



FFS.F2.BA2.LCE30 = Male F2 type fibre optic contact, ferrule bore diameter of 125 μm, PEEK body, Zirconia ceramic ferrule, crimp cable fixing, for tight jacket cable with a diameter between 1.7 to 3.0 mm.

Models - Series

FHA Straight plug with cable adapter or collet and nut with bend relief



Reference		Dimensions (mm)

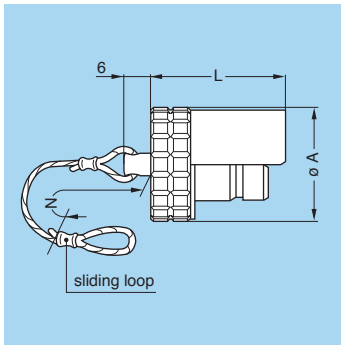
Accessories

BFA **Cap** (for FHA and FWA plugs)

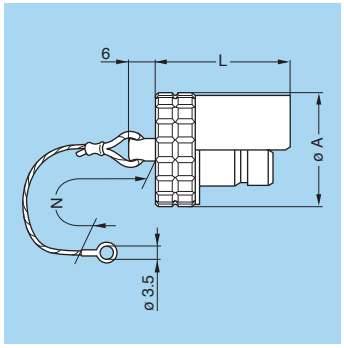


- Body material: Anthracite nickel plated aluminium alloy
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- Maximum operating temperature: 125°C
- Watertightness: IP50 according to IEC 60529

Part number	Dimensions (mm) A	L	N[1)]
BFA.SH.100.XAZ	21.8	23.5	120
BFA.MH.100.XAZ	25.4	30.0	120

Note: 1) the tolerance on this dimension is ± 5 mm.

BHA **Cap** (for FHA and FWA plugs)

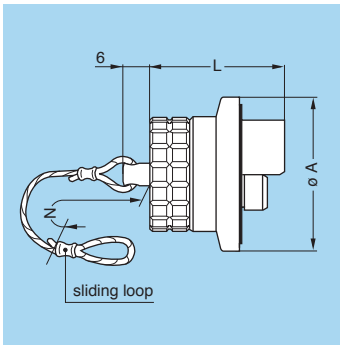


- Body material: Anthracite nickel plated aluminium alloy
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- Maximum operating temperature: 125°C
- Watertightness: IP50 according to IEC 60529

Part number	Dimensions (mm) A	L	N[1)]
BHA.SH.100.XAZ	21.8	23.5	120
BHA.MH.100.XAZ	25.4	30.0	120

Note: 1) the tolerance on this dimension is ± 5 mm.

BFE **Cap** (for FHE and FWE plugs)

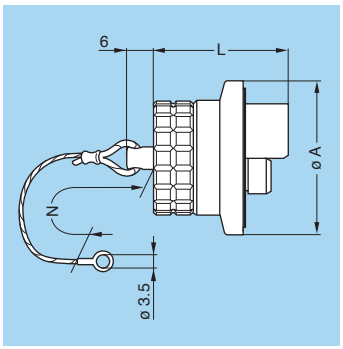


Part number	Dimensions (mm)		
	A	L	N[1)]
BFE.SH.100.XAS	28.5	23.5	120
BFE.MH.100.XAS	34.0	30.0	120

- Body material: Anthracite nickel plated aluminium alloy
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber
- Maximum operating temperature: 125°C
- Watertightness: IP68 according to IEC 60529

Note: 1) the tolerance on this dimension is ± 5 mm.

BHE **Cap** (for FHE and FWE plugs)



Part number	Dimensions (mm)		
	A	L	N[1)]
BHE.SH.100.XAS	28.5	23.5	120
BHE.MH.100.XAS	34.0	30.0	120

- Body material: Anthracite nickel plated aluminium alloy
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber
- Maximum operating temperature: 125°C
- Watertightness: IP68 according to IEC 60529

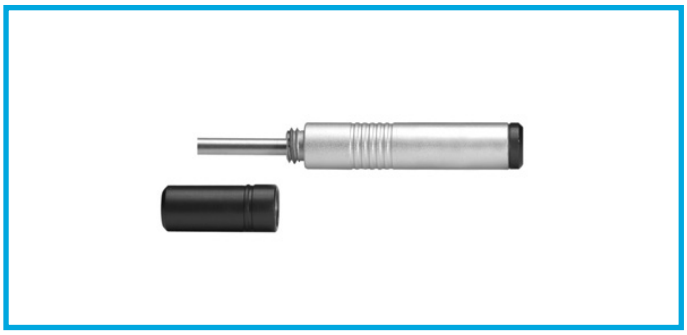
Note: 1) the tolerance on this dimension is ± 5 mm.

Tooling

WST.KI.125.34 Cleaning kit for F2 fibre optic contact

Description
Fibre optic cleaning kit of 2 cotton buds, 1 dry and 1 being soaked in IPA (Isopropyl Alcohol) used for cleaning the fibre optic contacts.

DCC.91.312.5LA Extraction/Installation tool for F2 fibre optic contact



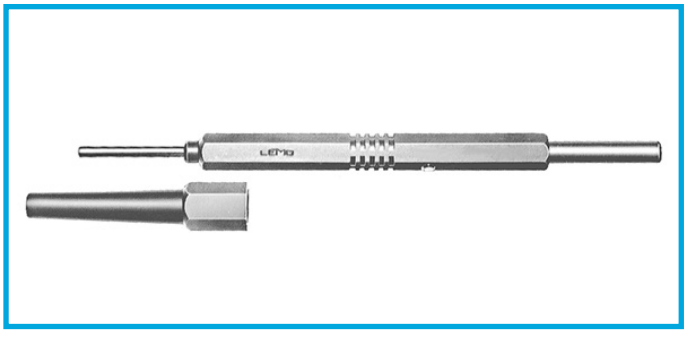
DCS Contact alignment device tool for F2 or F7 fibre optic contact

Description
Simple tool with two threaded end for installation/extraction of the F7 contact alignment device.

Part number	Contact type
DCS.F2.035.PN	F2
DCS.F7.035.PN [1)]	F7

Note: [1)] Included in the LEMO F7 workstation.

DCC Extractor for F7 fibre optic contact



Description
Manual tool for the extraction of the F7 contact.

Part number
DCC.91.307.5LA [1)]

Note: [1)] Included in the LEMO F7 workstation.

Product safety notice

PLEASE READ AND FOLLOW ALL INSTUCTIONS CAREFULLY AND CONSULT ALL RELEVENT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION.
IMPROPER HANDLING, CABLE ASSEMBLY, OR WRONG USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.

1. **SHOCK AND FIRE HAZARD**
   Incorrect wiring, the use of damaged components, presence of foreign objects (such as metal debris), and / or residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock.
   Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

2. **HANDLING**
   Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification.
   Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

3. **USE**
   Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

4. **TEST AND OPERATING VOLTAGES**
   The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalog however these may be influenced by PC board design and / or wiring harnesses.
   The test voltage indicated in the catalog is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

5. **CE MARKING** CE
   CE marking CE means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives.
   CE marking CE applies to complete products or equipment, **but not to electromechanical components, such as connectors**.

6. **PRODUCT IMPROVEMENTS**
   The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

7. ⚠ **WARNING (Prop 65 State of California)**
   Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. LEMO products are exempt from proposition 65 warnings because they are manufactured, marketed, and sold solely for commercial and industrial use. For further information, please visit https://www.lemo.com/quality/LEMO-Prop-65-compliance-declaration.pdf.
