

NCP436FCT2GEVB: Controlled 3.0 A Load Switch, without Auto-Discharge Path, Evaluation Board

Evaluation/Development Tool Description

The NCP436FCT2GEVB evaluation board is designed to quickly test the NCP436, a very low Ron MOSFETs controlled by an external logic pin, allowing optimization of battery life, and portable device autonomy.

Evaluation/Development Tool Information

Product	Status	Compliance	Short Description	Parts Used	Action
NCP436FCT2GEVB	Lifetime	Pb-free	Controlled 3.0 A Load Switch, without Auto-Discharge Path, Evaluation Board	NCP436FCT2G	» Contact Local Sales Office
