

Product Change Notification

Dear Colleagues,

Intesis appreciates the daily involvement and the long-term loyalty of our customers. We understand that staying updated on the current and future happenings is of vital importance to our joint success. To this end, we would like to inform you of the changing life cycle and replacement availability for the following products.

Due to the global components' shortage we are forced to migrate a critical component located in our range of Protocol Translator. This change is mandatory to continue serving the products to the market but will not modify the functionality of the actual interface. Indeed, the replacement products will bring significant additional benefits.

Please find here the replacement information and the expected availability. The actual articles will enter the life-cycle phase "Exit", and the customers must shift to the replacement product.

Key Milestones

2022-11-01	The above listed protocol translators will be replaced by new articles of the 700 series covering the exact same functionality with additional benefits. These articles will enter the life-cycle phase "Exit", and the customers must shift to the replacement product.
2022-12-30	Last buy order deadline for the above mentioned Intesis products.

Reason for Change

Ensure product availability due to lack of a critical components caused by global component shortage.
Customers are forced to shift to the replacement gateways with same functionality.
