

Four-conductor 16 AWG trailer cable from Remington Industries is a great fit for many trailer wiring projects. The GPT automotive-grade wires are insulated with color-coded PVC to better resist oils, fuels, solvents, and outdoor conditions. Additionally, the four wires come bonded together for a cable solution that is organized and easy to work with.

This trailer cable is ideal for routing power to lights, brakes, and other systems between cars, trucks, trailers, RVs, and more. Remington Industries offers trailer wire in several configurations to best meet your specifications, and in multiple lengths for your convenience.
