

Industrial GPS Asset Tracker

Today's asset-intensive organizations must constantly track, monitor, and manage a wide range of physical assets, including inventory, plant and production, infrastructure, and vehicles. Precise tracking helps organizations optimize asset utilization, scheduling, maintenance, and supply chain management. This is essential for improving operational efficiency and minimizing lost inventory, equipment failures and unplanned downtime.

TEKTELIC's compact, ruggedized Industrial GPS Asset Tracker is the ideal tracking device for geolocating your assets in the field. This device provides GPS enabled near real-time satellite location tracking for a wide range of outdoor, unpowered, and high-value assets including railcars, shipping containers, shipped crates and parcels, mobile trailers, fleet vehicles, industrial equipment, shipping pallets, and deep storage assets.

Applications:

Shipping Containers

Pallets

Railcars

Fleet Vehicles

Industrial Equipment

Functions:

» Precise GPS

» Accelerometer

» 8-10 Year Battery Life

» Data Transmission via LoRaWAN®

» All Global ISM bands
