

**Issue Date:** December 11<sup>th</sup>, 2019

Dear Valued Customer,

This notice is to inform you that Littelfuse will be obsoleting item(s) you have purchased from us.

***Description of the Change:***

- Littelfuse will obsolete and no longer support production of 9011 or 9011-BX.

***Reason for The Change:***

- These are very mature products that have seen sharply declining volumes in recent years, and as such, one of our suppliers will no longer make components necessary for Littelfuse to continue production of the finished goods.

***Effective Date of the Change:***

- December 11<sup>th</sup>, 2019

***What You Need to Do:***

- Due to the abrupt nature of this change, we have secured remaining component stock and will be able to sell remaining finished good stock on a first come, first served basis.
- On all open orders, we will communicate the quantities we will be able to support.
- Please shift any future demand from these parts.

Littelfuse does have a number of screw-terminated momentary start switches that can be found on our website. Unfortunately, none of them have the same mounting method or footprints (for example, 90047 or 90048). If you have any questions, please contact your Littelfuse Customer Service Representative or your Inside Sales Representative. We appreciate your business and continued partnership.

Sincerely,

Zachary Naughton  
Global Product Manager  
Littelfuse Commercial Vehicle Products
