Product:	Rib-Cage™ Connectors		Part Numbers Concerned:	See list attached
Product Manager:	David Hansen		Issue Date:	20 Sep, 2008
			Page(s):	1/1
Distribution:	GLOBAL			

Subject:
Rib-Cage™ Connectors colour Change

Nature of change:
Housing colour for all connectors will change from “black” to “natural.”

Impact of change:
None. Resin will remain the same. Only the colour will change. These connectors are internal board-to-board connectors; Colour is not normally a customer requirement. Older black connectors mate with newer natural connectors.

Reason for change:
This change will consolidate resins and support increased responsiveness to customers. Manufacturing lead time for promoted Rib-Cage™ part numbers is normally two weeks.

Key Ribcage Differentiator:
Rib-Cage™ Connectors feature a fault-tolerant contact interface and an extra-ordinary temperature range suitable for “extreme” customer applications:
-55 deg. C. to +130 deg. C.

Part Numbers Affected:
See attached Excel spreadsheet.

Implementation dates:
After December 20, 2008
