

Dear Kunbus Partner

All open orders of RevPi Core 3 (PR100257) and RevPi Connect (PR100274) can unfortunately **no longer** be produced and therefore not be shipped, as we will not receive any Compute Modules 3 **at all** from the Raspberry Pi Fondation. New orders **cannot** be accepted anymore. The swap to 4SE and 4S is **strongly recommended**.

We will be able to dispatch RevPi Core3+ (8, 16, 32 GB - PR100299; PR100300; PR100301) and RevPi Connect+ (8, 16, 32 GB - PR100302; PR100303; PR100304) devices only in **very small** quantities in the next coming weeks. Exact quantities and delivery times can unfortunately not be given, as we only manufacture those devices we receiving of Compute Modules 3+ from the Raspberry Pi Fondation. However, these will be very small quantities! New orders can unfortunately not be confirmed anymore. A swap for the currently confirmed orders to 4SE and S would be **recommended**.

We are happy to support you!

Freundliche Grüße / Best Regards / Cordiali Saluti
