

## DisplayPort 1.2 to VGA Active Converter, DisplayPort to HD15 (M/F), 1920 x 1200/1080p, 6 in.

MODEL NUMBER: **P134-06N-VGA-V2**

Converts a DisplayPort 1.2 video signal for display on a VGA monitor, projector or television.

### Description

The P134-06N-VGA-V2 DisplayPort 1.2 to VGA Active Converter connects a DisplayPort 1.2 computer to the VGA port on a monitor, projector or television. With a male DisplayPort connector and a female HD15 connector, this converter lets you use your existing VGA display instead of buying a new DisplayPort monitor.

Ideal for displaying video on a large monitor or digital sign, this converter supports high-definition video resolutions up to 1920 x 1080 (1080p) and computer video resolutions up to 1920 x 1200. Because it's an active converter, the P134-06N-VGA-V2 converts both Single-Mode and Dual-Mode (DP++) DisplayPort output. It's perfect for use with graphics cards, such as AMD Eyefinity, that do not output DP++ signals.

Plug and play with no software, drivers or power supply needed. Gold-plated connectors and contacts ensure excellent conductivity. Integral strain relief ensures the converter and molded connectors last a long time. The P134-06N-VGA-V2 is backward compatible with previous DisplayPort generations and fits easily in a briefcase, backpack or laptop bag for connecting on the go.
