1. Introduction

The purpose of this PCN is to communicate the End of Life for the NimbeLink NL-SW-LTE-TC4EU Skywire modem. This EOL is driven by the chipset supply chain constraints. The chipset provider is not producing the chipset in volumes sufficient to support any further manufacture of the cellular module and the related NimbeLink Skywire modem.

2. Migration Overview

NimbeLink is recommending customers review the following hardware compatible replacement modem, [NL-SW-LTE-TC4WWG](#).

Orderable Part Number	Description
NL-SW-LTE-TC4WWG	LTE CAT 4, Worldwide with GPS

3. Last Time Buy

NimbeLink will provide best commercial efforts to support limited Last Time Buy quantities out of existing distribution inventories.

The limited support of the chipset introduces more risk for the delivery of Last Time Buy modules and modems compared to the design effort required to migrate to newer, more readily available modems. These extraordinary circumstances are further evidence in support of the pin migration capability within the Skywire families of modems.
