

Product End of Life Notification

EOL #: 2022-02

Date: December 5, 2022

Products impacted:

Laird Thermal Systems part number 1550.00 (LTS Model WL5000)

Reason for discontinuance:

The LTS 5kW ambient cooling system was redesigned to offer a number of product improvements.

1. UL marked for Laboratory Equipment (ANSI / UL / CSA / IEC EN 61010-01).
 2. Temperature difference required to transfer 5kW of energy at the nominal operating point was reduced by 40%. This results in 2.2kW of additional heat transfer at the 10.5°C temperature differential.
 3. A reservoir was implemented into the system design with a level switch to improve pump reliability.
 4. System operating noise maintained at or below WL5000 model while achieving higher performance.
