MG Chemicals Introduces... 844AR - Acrylic ESD Coating

Permanent Flexible ESD Protection

844AR is a one-part, flexible, permanent ESD safe coating

It is commonly used in electronic assembly lines to protect against electrostatic charge buildup on workstation surfaces, enclosures, assembly trays, bins, production conveyors and bumpers.

Features and Benefits:

- Permanent electrostatic discharge protection
- Quick dry
- Room temperature storage
- Superior adhesion
- Flexible, smooth, durable, and abrasion resistant
- Low VOC and HAP free
- Does not contain toluene, xylene or MEK

Applications:

- Electronic assembly workstations
- Enclosure of delicate electronic components
- Electronic component assembly bins and trays

Available Sizes:

Cat. Number	Net Weight / Volume	Format
844AR-340G	340 g [12.0 oz]	Aerosol
