

micro:bit Battery Holder - 2xAAA (JST-PH)

PRT-15101

DESCRIPTION

This is a unique two-cell AAA battery holder built specifically for the BBC micro:bit. The 6" (~150mm) cable has been terminated with a JST-PH connector.

The connector mates the JST socket on the micro:bit perfectly, allowing you to easily make your project battery powered.

Note: Please keep in mind that JST connectors are not suited for constant and repeated removal and insertions and may wear out over time.
