Subject: MEAS HCT LVDT transmitters

**To whom it may concern,**

Measurement Specialties, Inc. has dropped the Intrinsic Safety certifications from our 2-wire HCT-IS Series of LVDT transmitters. As a result, the new model is called HCT. The prices remain unchanged.

The revised data sheet is available on MEAS web site at: <http://www.meas-spec.com/position-sensors/linear-displacement-sensors/lvdt-transmitters-and-transmitter-systems.aspx>

We have not changed the part numbers. The current HCT-IS bills of materials were changed under ECO in December last year. Therefore all current orders will be satisfied with parts that do not include any Intrinsic Safety certification markings such as FM or CSA. If you believe that this could be a problem for customers in your area, please contact them immediately.

We apologize for the late communication on this issue.

Best regards,
