## 2 Type of change

- Improved marking readability
- Performance enhancements

## 3 Detailed description of change

Current marking and layout (example)	New marking and layout (example)
	

Letters do not change

## 4 Reason of change

- Symmetric marking to provide marking readability independent from device placement in blister
- Layout of conductive path adapted to minimise voltage drop in order to enhance the performance

## 6 Release date

The roll-out of this change will start at week 14 with date code 1514 and will last approx. 6 months.

## 7 Impact of change and recommended action

Form: Yes New product marking, improved layout of conductive paths  
 Fit: No No dimensional change  
 Function: No No functional changes  
 Production Site: No Production site remains  
 Product Label: No No label change
