Re EVS-RP6020 Part Number Changes

To whom it may concern,

There will be a change to the TDK-Lambda part number for the EVS-RP reverse protection modules, effective April 1st, 2018. The modules, originally designed for use with the EVS series of constant current power supplies, are gaining popularity in general purpose "ORing" applications, including N+1 redundancy and battery charging. The new part numbers are to establish the items as a general accessory, rather than part of the EVS series.

Current Part Number	New Part Number
EVS-RP6020	RP-60-20
EVS-RP6020/L	RP-60-20/L

This will not affect physical appearance, functionality or pricing.

Sincerely,

Tom Tillman
Director of Marketing
