Product Change Notification

TDK Corporation  
Communication Devices Business Group  
Director, Product Marketing  
Harvey Espinoza  
Mobile RF Components Division Head  
Hironori Sakaki

Thank You for your business and continued interest in TDK's RF Components.

Name of change Lifecycle status change from production to NRND for the following RF Components.

TDK Part #		Alternative Suggestion	
DEA102500LT-6307A1		DEA102700LT-6307A2	

**Purpose**

This is an official notice of the production status change for the product mentioned above. This product has been revised to Not Recommended for New Design or "NRND". NRND is a production status classification that indicates a part number is approaching the end of its product life cycle. It is not End of Life, rather NRND represents the period between mass production and End of Life (EOL). NRND addresses the natural decline in market sales and may identify a consolidation/changing of the product portfolio dependent on market conditions.

TDK will offer a suggested replacement alternative whenever possible. These suggested alternative components may not be 100% the same in electrical performance and mechanical dimensions. The main objective is to provide suitable alternates from the available TDK RF Components Portfolio. Should you have any questions please contact your TDK Sales Representative for additional support.
