PCN-2017-03-01
March 01, 2017

Dear Valued TRINAMIC Customer,

this is to inform you that a new firmware version **V1.42** has officially been released for the module

TMCM-6110

Modules will be delivered together with this new release. Modules already shipped can be updated to this new release using the firmware update feature of the TMCL-IDE via serial interface. The new firmware and updated documentation will be available for download from the Trinamic website. Prior releases are still available on request. If you have any questions, please contact your sales partner.

Firmware Changes (compared to V1.35):
- MVP COORD command corrected if multiple axes are used.
- Introduction of new end switch power down mode (axis parameter 150).
- Update of TMCM-6110 firmware manual.

This change is classified as a minor change.
