

MEC EOL Announcement
 Re: Low Temperature Switches

July 18, 2014

MEC Customers,

Effective 12/31/2014, MEC will discontinue the availability of the low-temperature switches listed below. Reducing the number of standard parts available will free up production capacity and, given the rapidly growing demand for high-temperature switches, will shorten lead times. The crosses provided are identical in regards to form, fit and function.
