1 Description

The fast connection plugs **SUBCON-PLUS.../M12** are designed specifically for use in PROFIBUS- or CAN-based systems. They enable the quick and easy connection of bus lines under field conditions.

The plugs are ideal for use in the series production of machines and whenever an error-free installation is required. Because the M12 connections are easy to handle, you can ship the machines worldwide and have them assembled locally.

The plugs provide a simple and safe connection between the control cabinet (IP20) and the waterproof M12 world (IP65).

Features

- Easy startup, plug and play
- Error-free installation, particularly in series production of machines
- Fast connection thanks to M12 SPEEDCON fast locking system
- Light weight
- Termination with M12 termination resistor
- Versions with programming connection available
- Fully sealed housing for harsh ambient conditions
- Extended temperature range
- Plated-through shielding from M12 connection to D-SUB

5 Plugs for PROFIBUS

5.1 Technical Data

Plugs for PROFIBUS	
Plug connection	9-pos. D-SUB pin strip
Programming connection	9-pos. D-SUB socket strip
Connection for incoming and outgoing bus	M12 connector, B-coded, 5-pos.
Data interface	PROFIBUS
Bus line	M12 bus lines up to 12 Mbps
D-SUB insertion cycles	>200
Mounting screws	4-40 UNC
Maximum tightening torque	0.4 Nm
Pin assignment	3, 5, 6, 8
Temperature range	
Operation	-30°C ... +80 °C
Storage/transport	-40°C ... +85 °C
Assembly	-20°C ... +80 °C
Relative humidity	10% ... 75 % at 25 °C, non-condensing
Altitude	5000 m (for restrictions see manufacturer's declaration)
Degree of protection	IP40
Housing material	Polyamide

5.4 Connecting

Figure 8 Connecting

M12 SPEEDCON connections can be connected and locked with just half a turn. The termination resistor can be conveniently screwed on in accordance with the M12 standard.

- Connect the termination resistor to the incoming M12 port of the first SUBCON plug with the socket (order no. 1403911).
- Connect all further devices in the line using standard M12 Profibus cables (e.g. order no. 1518148).
- Connect the termination resistor to the outgoing M12 port of the last SUBCON plug with the pin (order no. 1507803).

5.5 Linear Expansion

Speed [kbit/s]	Segment length [m]	Permitted branch lines per segment
9.6 / 19.2 / 45.45 / 93.75	1200	32 x 3 m
187.5	1200	32 x 2 m
500	400	32 x 1 m
1500	200	32 x 0.3 m
3000 / 6000 / 12000	100	Not permitted

6 Plugs for CAN/CANopen®

6.1 Technical Data

Plugs for CAN/CANopen®	
Plug connection	9-pos. D-SUB socket strip
Programming connection	9-pos. D-SUB plug strip
Connection for incoming and outgoing bus	M12 connectors, A-coded, 5-pos.
Data interface	CAN/CANopen®
