BULLETIN:	Transition to new FW and deprecation of SKUs		
URGENCY:	High		
EFFECTIVE DATE:	Effective Immediately		
FOR DISTRIBUTION TO:	All WP7702 and FX30 customers and their partners		

Summary

Sierra Wireless is announcing the commercial availability of its latest WP7702 and FX30 software release, version 15. This version is a major update to the Legato application framework and Linux kernel. Updating the Legato framework and Linux kernel is important to keep the products secure with the latest security updates from Sierra and the Linux community. There are no impact to regulatory or carrier certification. No certification updates are needed.

A beta version of Release 15 is currently available on Leaf for early evaluation and feedback. For more information on how to use Leaf, please refer to Legato.io.

All SKUs using the legacy FW versions will be deprecated 3 months from the date of this notice and no new orders for legacy SKUs will be accepted after the effective date. These SKUs will be replaced by new ones using the Release 15.

Details of Change

The following table summarizes the legacy SKUs that are being replaced with new ones running Release 15

Legacy SKUs	Replacement SKUs
WP7702	
1103530 WP7702, GENERIC, GENERIC, R9 1104214 WP7702, GENERIC, GENERIC/AT&T/VERIZON, R11	1104918 WP7702, GENERIC, GENERIC, R15.0.3; R2C

Effective Dates

This change is effective immediately and customers should transition to Release 15 and the replacement SKUs as soon as possible.

No new orders will be accepted for the legacy SKUs. Any existing orders with requested shipment date on or after **April 1, 2022** will need to be updated to use the replacement SKUs.
