Inductors for power circuits
Thin-film metal magnetic material
PLE series

PLEA67B type

FEATURES

- Thin-film power inductor based on the thin-film processing techniques and metallic magnetic materials.
- Due to the high magnetic permeability magnetic material, it has both high inductance of 2.2uH and low DC resistance in spite of its small size of 1006 (L1.0xW0.6xT0.7mm).
- The low-loss magnetic material makes it possible to achieve low AC loss and provide a highly efficient power supply circuit in solutions that emphasize AC loss.

APPLICATION

- Wearable product (wireless earphones and smart watch), small power supply module and low power consumption communication module of Bluetooth Low Energy
- Application guides: TWS (True Wireless Stereo)

PART NUMBER CONSTRUCTION

PLE	A67	BBA	-	2R2	M	-	1P	T	00
Series name	L×W×H dimensions 1.0x0.6x0.7 mm	Characteristic type		Inductance (µH)	Inductance tolerance		Number of lines	Packaging style	Internal code

CHARACTERISTICS SPECIFICATION TABLE

L (µH)	Tolerance	L measuring frequency (MHz)	DC resistance (mΩ)max.	DC resistance (mΩ)typ.	Rated current* Isat (A)max.	Rated current* Isat (A)typ.	Rated current* Itemp (A)max.	Rated current* Itemp (A)typ.	Part No.
1.0	±20%	1.0	265	220	0.8	1.0	1.0	1.2	PLEA67BBA1R0M-1PT00
2.2	±20%	1.0	620	510	0.5	0.6	0.5	0.8	PLEA67BBA2R2M-1PT00
4.7	±20%	1.0	1080	900	0.3	0.35	0.4	0.6	PLEA67BCA4R7M-1PT00

* Rated current: smaller value of either Isat or Itemp.
Isat: When based on the inductance change rate (30% below the initial L value)
Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

Measurement equipment

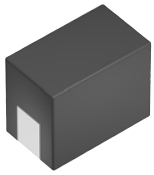
Measurement item	Product No.	Manufacturer
L	E4991	Keysight Technologies
DC resistance	4338A	Keysight Technologies
Rated current Isat	E4991+16200B	Keysight Technologies

∗ Equivalent measurement equipment may be used.

TEMPERATURE RANGE, INDIVIDUAL WEIGHT

Operating temperature range*	Storage temperature range**	Individual weight
–40 to +125 °C	–40 to +85 °C	3 mg

* Operating temperature range includes self-temperature rise.
** The storage temperature range is for after the assembly.



⚠ Please be sure to request delivery specifications that provide further details on the features and specifications of the products for proper and safe use.
Please note that the contents may change without any prior notice due to reasons such as upgrading.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

⚠ REMINDERS

- The storage period is within 6 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 20 to 75% RH or less).
  If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Before soldering, be sure to preheat components.
  The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
  If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Carefully lay out the coil for the circuit board design of the non-magnetic shield type.
  A malfunction may occur due to magnetic interference.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- Do not expose the products to magnets or magnetic fields.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
  The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
  If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

(1) Aerospace/aviation equipment
(2) Transportation equipment (cars, electric trains, ships, etc.)
(3) Medical equipment
(4) Power-generation control equipment
(5) Atomic energy-related equipment
(6) Seabed equipment
(7) Transportation control equipment
(8) Public information-processing equipment
(9) Military equipment
(10) Electric heating apparatus, burning equipment
(11) Disaster prevention/crime prevention equipment
(12) Safety equipment
(13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.
