LF PCN A0106: 0327 Capacity expansion -- additional dial table

Jul 12, 2016

Dear Valued Customer,

As part of our process to maintain capability and capacity on standard product lines sold to multiple customers, Littelfuse is taking the following actions for the 0327 MICRO2 blade fuse series:

Littelfuse will add one Dial Table assembly machine to expand capacity. There are no changes to the rest of the assembly equipment. This will be additional capacity and is exactly a copy of the current Dial Tables machines; this action is being taken to protect supply. The new equipment will have no impact on the Form, Fit, or Function of the product.

The target date for introduction is July 11, 2016.

Impacted Materials:

Product Series	Style / Description
