Re: WAGO 750-657 IO-Link Module End of Life Notice

Dear Sir or Madam,

WAGO's Automation platform was first launched in 1995 and we continue to expand the product line with new controllers, couplers, and I/O modules. Ultimately, we know the life cycle of each specific product is not endless. The current market situation for semiconductor components together with a component discontinuation unfortunately means that the 750-657 will be discontinued.

Background of discontinuation:

Product and component shortages due to global supply chain issues.

Products/Versions being discontinued:

Item number	Item Name
750-657	4 Channel IO-Link Master

Last call date:

We have set March 31st, 2023, as the last call date for these items. The Last Call Date is the last order date in which you can still order the items. After the last call date, a new order can no longer be processed.

Last delivery date:

We have set September 30th, 2023, as the Last Delivery Date. All orders received by the Last Call Date will be delivered by this date.

Alternative options:

Discontinued product		Successor product	
Item number	Article description	Item number	Article description
750-657	IO-Link Master	750-1657	IO-Link Master

The successor product is largely functionally compatible. Since it contains a more up-to-date IO-Link stack, the 750-1657 module is not exchange-compatible. Project planning and application modifications must be adapted in the case of replacement. Due to the tight component market, delivery of the successor product is scheduled for Q2 2023.

WAGO's goal is to fill last-call orders with the 750-657, however we ask for your understanding that we reserve the right to reduce quantities and to substitute the successor product if necessary.

Please ask a WAGO representative to help you select an alternative or contact our technical support line at 1-800-DIN-RAIL.

Sincerely,

WAGO Corporation
