TBU® HIGH-SPEED PROTECTORS

March 21, 2019

Additional Assembly Site for Model TBU-DB-Q TBU® High-Speed Protectors

The Bourns® [Model TBU-DB-Q](#) TBU® High-Speed Protector Series will now be assembled at an additional site to help support the increasing demand for these devices.

Currently, these devices are assembled in Laguna, Philippines. The addition of an assembly site in Shanghai, China will help provide a secure, flexible supply chain to our customers. This new assembly site in Shanghai, China is an existing assembly site for other Bourns® Model TBU® High-Speed Protector Series.

Assembly at the additional site does not impact the form, fit, or function of the products. The qualification test data and evaluation samples will be available on June 26, 2019.

The affected part number is listed in the table below. Once deliveries from the additional assembly site begin, Bourns will not differentiate TBU-DB-Q devices based on the assembly site location.

Affected Part Number

TBU-DB055-100-WH-Q

Implementation dates are as follows:

First date code using the above changes: **931**

Date that deliveries of products from the additional location will begin: **August 1, 2019**

If you have any questions or need additional information, please feel free to contact [Customer Service/ Inside Sales](#).
