Re: Discontinuation Notice – M-GAGE S18M

---

Banner Engineering is issuing notification regarding the discontinuation of all M-GAGE S18M barrel style magneto-resistive sensors. A key component has been discontinued requiring a design change used in these models and due to low sales volume, Banner cannot justify the continuation of this niche sensor platform.

Alternative magneto-resistive sensors used for a variety of traffic, parking, loading dock, car wash, drive-thru lane, and other vehicle detection applications for your consideration would be the Wireless M-Gage Flex Power Nodes or the wired Q7M Flat-Pak style sensors.

Authorized channel partners will have until June 30, 2021 to place any Last Time Buy orders for these S18M models ( affected model numbers attached ).

Please notify your customers who have previously purchased these products and work with your Banner application and technical support teams for alternative solutions.

Thank You!
