**Notification of additional production site for Malaysian factory products**

We applied for an additional production site in Indonesia in the past, but it takes time to receive approval from the related customers. We would like to inform you again.

- 1 Applicable products  
Please refer to the attached product list.
- 2 Additional production site.  
Because our Malaysian factory was suspended in 2020 due to the influence of COVIT-19 and the operation restriction order by Malaysian government, connector supply shortage was caused. And we are still subject to employment restrictions.

On the other side, we received many requests for BCP from our customers. As Indonesia government has different policies prioritizing economic activities and lenient restrictions, we started equipment production and already started production of some products in Indonesia factory with BCP requests.

- 3 Timing of additional production site  
The production of some products already started in Indonesia factory from February 2021.
- 4 Your acceptance  
We would like you to inform Hirose business representative of your approval by the end of May, 2021.

If you should have any questions, please feel free to contact Hirose business representative.  
Your understanding and cooperation are highly appreciated.
