

Black Woven USB A or Type-C to Type-C Cable with Magnetic Tip – 1 meter long

Product ID: 5520

Description

Some days we're feeling extra fancy here at the 'fruit warehouse, and we have a big soft spot for woven fabric cables. Our latest addition to the collection is this 1 meter long Black Magnetic USB A or USB C to USB C Cable with a Magnetic Type C tip! It's a luxurious cable that will make managing lots of dev boards or gadgets super easy.

First up, the 'host part' of the cable has a USB A end, but if you pull the cap off, it reveals a USB C connector – so you can use this with *any computer no matter what port is available!*

The real magic is on the device end – the USB C end is a removable magnetic end that lets you quickly connect or disconnect with magnetic alignment. It's like having a 'MagSafe' connector for everything. Works with any and all devices, for both data and power, up to 100 Watts.
