

Honeywell Announces a Change to the Long Port Dimensions in the MicroPressure Board Mount Pressure Sensors, MPR Series

Effective immediately, Honeywell announces changes to the port dimensions for the long port variants up to pressure range of 25 kPa or 250 mbar. These changes do not effect the pressure sensor function or the sensor application mounting/pressure interfacing except with a minor change in the marked dimensions included in the diagram below.

ABOUT THE MPR SERIES

The MPR Series is a very small piezoresistive silicon pressure sensor offering a digital output for reading pressure over the specified full scale pressure span and temperature range. It is calibrated and compensated over a specific temperature range for sensor offset, sensitivity, temperature effects, and non-linearity using an on-board Application Specific Integrated Circuit (ASIC). This product is designed to meet the requirements of higher volume medical (consumer and non-consumer) devices and commercial appliance applications. For additional materials, please visit the [MPR Series webpage](#).

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**
