PRODUT CHANGE NOTICE

Product: Model: All ZTA-□.□□MG and ZTT□.□□MG thru-hole Ceramic Resonators

Attention: All Appropriate Supply Chain Personnel and Customer Base

From: Dan Kelly, Director of Engineering, ECS, Inc. International

Subject: **All ZTA All ZTA-□.□□MG and ZTT□.□□MG thru-hole Ceramic Resonators**

Summary of Change: With the incorporation of more automated equipment to assemble the resonator there is a change to the appearance of the ceramic resonator as well as the color of the conductive epoxy from "burnt orange" to "blue" due to the more automated epoxy coating process.

This conversion does not and will affect electrical parameters or the performance of this product. The data sheet has not changed as this design meets all specifications as defined on the data sheet.

During this transition customers may continue to receive product in its original "burnt orange" color and in the new "blue" color as well.

ECS Inc. will take ever measure to see that each delivery is consistent in color so as to reduce confusion at the incoming inspection level. However, we cannot guarantee that from time to time that your delivery will include both colors.

Please direct your inquires to Dan Kelly should you have further questions. We thank you for your understanding and patience during this process.

Respectfully

Dan Kelly/Director of Engineering
