Business Unit: Electronics and HCS **PTN/22/013/C+N – US**

Product Range: HARTING T1 Industrial Date: 2022-09-14

Title: Phase-out of T1 Industrial IP20 1st Edition Page 1/5

Details of Product Termination

1. Affected Part Numbers

Please refer to the appendix section of this document for the complete list of products.

2. Reason for Termination

Due to revision of Single Pair Ethernet Connectivity IEC 63171-6 standard, HARTING has implemented required changes to the T1 Industrial mating interface to fully comply with the revised standard. As a result, HARTING is phasing out existing portfolio of T1 Industrial connectors, cable assemblies and tools, and replacing it with variants that fully comply with the updated IEC 63171-6 standard.

3. Possible Replacement Products

Please refer to the appendix section of this document for the complete list of products. Be aware that there is **no mating compatibility between 1st edition (discontinued) and 2nd edition products**. This means, 1st edition plug cannot be connected to the 2nd edition receptable and vice versa.

Please note that HARTING has replacement for each discontinued part number. Furthermore, outer appearance, product dimensions and PCB layout remained unchanged.

4. Last Time Buy

To avoid the risk of mixing old and new version, the old version is being discontinued with immediate effect.

In case of need for 1st edition parts, please contact HARTING directly.

In case of questions or concerns, please do not hesitate to contact our technical support.
