SOLAHD

Changes to the SolaHD™ SLN Series and SSW Series Uninterruptible Power Supplies

SolaHD SLN and SSW Series UPS Product Obsolescence

At Emerson, we value our customers and are committed to providing them world class product and service. Unfortunately, on occasion it is necessary to reduce complexity by rationalizing redundant designs and obsoleting legacy models. After careful consideration, we have decided to **discontinue the manufacture and sale** of select models of our SSW Mini Tower Line Interactive UPS and SLN Mini-Tower Off-line UPS **as of July 31, 2022**.

Below is a list of SolaHD UPS catalog numbers that are being phased out with a suggested alternate. Please note, these recommended alternates are based on a review of power and wattage rating. Emerson will fulfill orders on the legacy SLN and SSW Series catalog number based on available materials until the July 31st obsolescence date.

SolaHD Catalog Number	UPS Description	Recommended Alternate Catalog Number
SLN1000	Line Interactive, 1000 VA/600W, 120 Vac Input	SSW1000
SLN1500	Line Interactive, 1500 VA/900W, 120 Vac Input	SSW1500
SSW700	Sine Wave Output, 700VA/480W, 120 Vac Input	SSW1000

Emerson will continue to manufacture the remaining SolaHD SLN and SPS Mini-Tower Off-line UPS and the SolaHD SSW Mini-Tower Line-Interactive UPS products.

The marketing collateral will be updated in July, 2022 to reflect the obsolescence of the affected products. To learn more about the current offering visit www.appleton-emerson.com. The product data sheets are still available in SalesNet under SolaHD > Uninterruptible Power Supplies > Data Sheets, as well as in the literature [Store](#) under SolaHD > Uninterruptible Power Supplies.
