ELEV-8 Crash Pack

The ELEV-8 Crash Pack is a supplement to the [ELEV-8 Quadcopter Kit](#). It is not a complete kit.

The ELEV-8 Crash Pack contains the most commonly damaged components. The motor mounts and landing gear were designed to protect your equipment and absorb the force on landing and during an unexpected collision. The APC propellers are a common piece of gear to break, thus we included four in the pack!

This Pack will get you back up and flying from moderate crashes in no time.

Kit Contents:

- 4- APC 10x4.7 Composite Propeller
- 4- APC 10x4.7 Composite Pusher Propeller
