TSL2520

Highly Sensitive Ambient Light Sensor

General Description

The TSL2520 features ambient light sensing and comes in a low-profile and small footprint, L2.0mm x W1.0mm x H0.5mm optical QFN package.

The Ambient Light Sensing function provides two concurrent ambient light sensing channels, which can be arbitrarily connected to the photodiodes via a programmable multiplexer. TSL2520 incorporates a set of Infrared photodiodes and a set of Clear photodiodes. The Clear photodiode area is covered with a UV/IR blocking filter.

This architecture accurately measures ambient light and enables the calculation of irradiance of different light sources. Calculation results help to improve display appearance and picture taking.

Key Benefits & Features

The benefits and features of TSL2520 are listed below:

Figure 1:
Added Value of Using TSL2520

| Benefits	Features
• Invisible ALS sensing under any glass type	• Configurable, high sensitivity • Programmable gain and integration time • 8192x dynamic range by gain adjustment only • 1mlux detectable illuminance • Tailored ALS response • UV/IR blocking filter for Clear channel • ALS interrupt with thresholds
• Unique fast ALS integration mode	• Flicker-immune ALS sensing with programmable integration time
• Low power consumption and minimum I²C traffic	• 1.8V$_{DD}$ operation • Configurable sleep mode • Interrupt-driven device • I²C interface up to 1 Mbit/s (Fast mode)
• Integrated status checking for all functions	• Digital and analog saturation flags

Applications

TSL2520 integrates multiple applications within one device. The applications for TSL2520 include:

- Indoor/outdoor brightness information
- Brightness management for displays
- Camera image correction assistance

Block Diagram
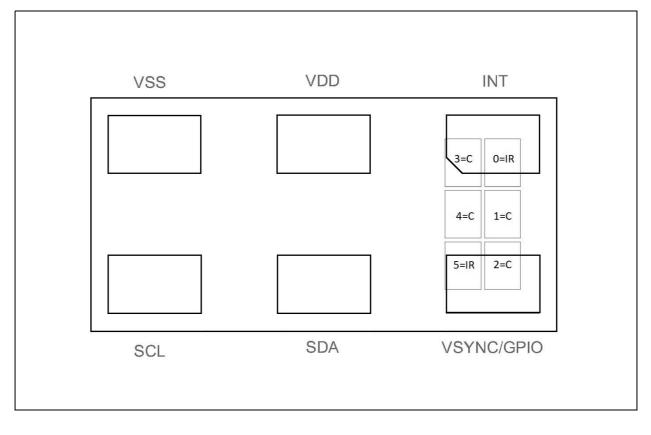

The functional blocks of this device are shown below:

Figure 2:
Functional Blocks of TSL2520

Pin Assignments

Device pinout is described below.

Figure 3:
Pin Diagram of TSL2520 (top view)

Figure 4:
Pin Description of TSL2520

Pin Number	Pin Name	Description
1	INT	Interrupt. Open-drain output.
2	VDD	Supply voltage (1.8V)
3	VSS	Ground. All voltages are referenced to VSS.
4	SCL	I²C serial clock terminal
5	SDA	I²C serial data I/O terminal
6	VSYNC/GPIO	Synchronization input OR General Purpose open-drain Input/Output

Ordering & Contact Information

Figure 5:
Ordering Information

Ordering Code	Address	Interface	Delivery Form	Delivery Quantity
TSL25203	0x39	1.8V I²C	Tape & Reel	10000 pcs/reel

RoHS Compliant & ams Green Statement

RoHS: The term RoHS compliant means that ams AG products fully comply with current RoHS directives. Our semiconductor products do not contain any chemicals for all 6 substance categories plus additional 4 substance categories (per amendment EU 2015/863), including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, RoHS compliant products are suitable for use in specified lead-free processes.

ams Green (RoHS compliant and no Sb/Br/Cl): ams Green defines that in addition to RoHS compliance, our products are free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material) and do not contain Chlorine (Cl not exceed 0.1% by weight in homogeneous material).

Important Information: The information provided in this statement represents ams AG knowledge and belief as of the date that it is provided. ams AG bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. ams AG has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. ams AG and ams AG suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.
